

# MODULAR YARD RAMP SYSTEMS

The perfect solution for creating a portable loading dock for access to trucks and trailers, this aluminum ramp system can easily be set up by two people in less than 15 minutes without any tools, and breaks down for compact storage on a single skid or pallet for easier transportation or storage.

The ramp system can be used in different configurations from 8' to 30' L, and will accommodate docks, trailers or trucks from 15" to 60" H. The entire system will fit in a pickup truck bed or a 4 x 8 trailer. Ships economically on one pallet via common carrier. US Patent #10710824.

## FEATURES & BENEFITS

- Modular design stores on a single pallet
- Height adjustable for trucks/docks between 15" and 60" H
- 15,000 or 18,000 lb. per axle capacity
- Built-in 4" guard rails and 18' ratchet straps for added safety
- Includes eight ramps, three height support stands
- Plate top end and knife foot
- EZ Traction punch plate surface

Part Number	L x W	Per Axle Cap.	Total Cap.
15-84-360-06-MYR	30' L x 84" W	15,000 lb.	25,000 lb.
18-101-360-06-MYR	30' L x 101" W	18,000 lb.	30,000 lb.
