# Ramp Installation

1. Before sliding the ramp assembly into the storage bracket, remove the safety bolt on the right side of the bracket.
2. Slide the ramp into the storage bracket until it fits in all the way.
3. Replace the safety bolt.
4. Close the door and secure the latch.  
\*Note: If the walk ramp is slightly too long because of manufacturing tolerances, reverse the direction of the bottom bolts on the latch to allow more room.
5. The latch fits through the storage bracket door, allowing you to lock it with a padlock if desired.

6. Cut two holes on the truck door sill that align with the hooks on the walk ramp, allowing you to hook the ramp into place for use. Cutouts may be reinforced with steel bar stock.
